SUMMARY

Final semester Computer Engineering student interested in web development and full-stack applications. Have hands-on experience building projects using React, Next.js, and Django. Looking for an opportunity to apply my skills, learn from real-world development, and grow as a developer.

EDUCATION

Bachelor of Engineering in Computer Engineering

United Technical College

2023 - Present

KEY SKILLS

- **Frontend Development:** HTML, CSS, React, Next.js, GSAP Animation
- **Backend Development:** Node.js (basic), Django
- **Database Management:** MySQL, MongoDB (CRUD Operations)
- **Machine Learning:** PyTorch, Neural Networks
- **Artificial Intelligence:** Generative AI, Deep Learning Fundamentals
- **Version Control:** Git, GitHub
- **Development Tools:** Visual Studio Code, Command Line Interface
- **Soft Skills:** Problem-Solving, Analytical Thinking, Team Collaboration, Adaptability

PROJECTS

House Rental System | Academic Project

- Technologies: Python, Django, MySQL, HTML, CSS
- Designed and implemented a rental management system to handle bookings, users, and property data.
- Created a structured database with clearly defined tables and relationships to manage data efficiently.
- Wrote SQL queries to fetch and update information quickly for the application.
- Developed user-friendly interfaces using HTML/CSS for a seamless experience across stakeholders.
- Built backend functionality with Django for user authentication and inventory management.

Lawyer Appointment System

- Technologies: React, Tailwind CSS, Recharts, JavaScript
- Contributed to designing a clean, responsive lawyer appointment system interface with a focus on simplicity and usability.
- Built reusable React components for appointment booking, lawyer profiles, and scheduling features.
- Styled the application using Tailwind CSS to ensure a modern, consistent, and mobile-friendly design.
- Integrated Recharts to visualize appointment data and analytics in an intuitive dashboard view.

Resume Analyzer | Personal Project

Technologies: Next.js, Node.js, Python

- Built a full-stack resume analysis tool to extract and evaluate candidate profiles.
- Implemented file upload and text parsing for PDF resumes.
- Developed API endpoints using Node.js for processing and scoring resumes.
- Designed an interactive UI to display skill match and suggestions.

CERTIFICATIONS

Generative AI Certification

Codeit Online Platform | 2025

Comprehensive training in the fundamentals of artificial intelligence, generative models, and practical AI implementation strategies.

TOPICS OF INTEREST

Full Stack Web Development, RESTful API Design, Java, Nextjs, Spring, Artificial Intelligence, Machine Learning, Frontend Architecture, Data Structures & Algorithms, System Design, Database Internals, Operating Systems, Software Testing, DevOps.
